

woodpulp raw material

D-TEX Wood pulp Spun lace Nonwoven material are made of Canadian imported wood pulp and SINOPEC excellent quality polyester fiber. Liquid pulp mix thoroughly, jet and entangle with fibers. Pure physical high-pressure water jet entanglement technology, no chemical adhesives are added. The chip removal rate is low, which meets the application fields with higher requirements for chip removal performance. For example, electronic parts industry, printing equipment, aerospace, etc.

Composition	Woodpulp/Polyester	Woodpulp/PP
Basic weight	38gsm~100gsm	40gsm~120gsm
Lapping	Parallel & Cross	PP back
Surface	Plain Mesh(D-1022) High-friction(D-1025) Classical creped(D-1027)	Plain Hexagon(D-1026) Diamond(D-1030)
Workable width	210cm, 260cm, 320cm	
Color	White, Blue, Turquoise, Medical green, Red, etc.	

Idea for

Industrial cleaning wipes, Auto blanket wash cloth, Car polishing towel, Aerospace cleaning wipes, Electronic industry wipes, General cleaning wipes, Daily surface cleaning wipes, workshop dry wipes, etc.
