

Introduction

Welcome to D-TEX Nonwovens company, we focus on researching, developing and manufacturing of spun lace nonwoven, since 2007.

We specialized on a broad range of wood pulp spun lace nonwoven material, 100% biodegradable spun lace material, Flushable material for wet wipes, 100% PP meltblown fabric. And we supply OEM/ODM service for customers.

D-TEX NONWOVENS is one of the few companies worldwide that have mastered liquid pulp jet and entangle with fibers.

Liquid wood pulp mix thoroughly, jet and entangle with fibers, like polyester, viscose and lyocell etc. In view of the proprietary liquid pulp technology, our woodpulp spunlace nonwoven fabric is more entangled and not easy to peel off.

Widely used in various industrial fields.

On this basis, we can provide different dyeing and embossing schemes according to customer requirements.
